SUBJECT INDEX

Active adhesion concepts, p. 934
Adaptive structures, p. 268
Angle brackets, p. 58
Anisotropy, pp. 58, 128, 1270
APC2, p. 327
Attenuation, pp. 210, 934
Bare IC chips, p. 1190
Bending moment, p. 76
Bending-shear stiffness, p. 677
Biaxial tension, p. 285
Biomimetics, p. 559
Blow molding, p. 498
Blown film, p. 633
Bolted joints, p. 128
Bonding theory, p. 1198
Boundary collocation, p. 128
Boundary element model, p. 787
Braiding, 3-D, p. 752
  geometric model, p. 752
  two-step braid, p. 752
  unit cell geometry, p. 752
Cascaded piezoelectric devices, p. 934
Cellular materials, p. 186
  chopped fiber composites, p. 186
  foams, p. 186
  polycrystals, p. 186
  unsymmetric stiffness, p. 186
Cellulosic fillers, p. 139
Chemical shrinkage, p. 698
Commingled yarn, p. 156
Composites
  anisotropic laminated, p. 854
  asymmetric, p. 58
  beams, pp. 210, 602, 642, 813
  braided, p. 156
  carbon/carbon, p. 825
  chopped fiber, p. 186
  compressive strength, pp. 813, 1016
  conductive, pp. 844, 1026
  curing, p. 520
  cylinders, pp. 198, 570, 698, 1070
  cylindrical bending, p. 1016
  dielectric properties, p. 173
  diffusivity, p. 973
  dynamic mechanical properties, p. 139
  environmental interaction of, p. 296
  fabric reinforced, p. 1096
  failure probability, p. 430
  fiber reinforced, pp. 2, 101, 227, 973, 1016, 1323
  flat shell, p. 76
  flexural response, p. 76
  holes, preformed, p. 559
  joints, pp. 128, 723
  kink propagation, p. 1016
  laminates, pp. 2, 227, 559, 712, 813, 888, 1043, 1058
  manufacturing, p. 520
  metal matrix, pp. 296, 1026
  newspaper fiber-reinforced, p. 1311
  panels, p. 237
  particulate, p. 1323
  PEEK/carbon, p. 916
  physical aging, p. 327
  plates, pp. 38, 76, 404, 876, 1026, 1221
  polyethylene, p. 139
  processing, pp. 698, 916
  reinforced with $(n - 1)$ inclusions, p. 670
  relaxation, p. 327
  reliability of, p. 430
  shear, p. 296
  shells, p. 101
  size effects, p. 256
  solid propellant, p. 48
  statistical flaws of, p. 430
  tapered beam, p. 386
  tensile strength, p. 430
  textile structural, p. 752
  thermoplastic, pp. 156, 624, 723, 916
  thermoset, pp. 173, 506, 545
  thick, pp. 520, 698
  three-point bending, p. 813
  tubes, p. 198
  uniaxial compression, p. 1016
  unidirectional, p. 457
Compression molding, p. 844
Computer-aided engineering (CAE), pp. 506, 769

SUBJECT INDEX

  three-point bending, p. 813
  tubes, p. 198
  uniaxial compression, p. 1016
  unidirectional, p. 457
Compression molding, p. 844
Computer-aided engineering (CAE), pp. 506, 769

Coupled motion, p. 642
Crack arrest concept, p. 778
Crack growth, p. 48
Crack propagation, p. 227
Creep, pp. 285, 296
Critical buckling pressure, p. 570
Crystallization measurements, p. 686
Curing, pp. 173, 1190, 1239
Cyclic loading, pp. 1111, 1190
Damage
  accumulation, p. 1111
  characterization, pp. 813, 888
  evolution, p. 296
  fatigue, p. 1058
  growth prediction, p. 341
  impact, p. 1281
DCB specimen, p. 1295
Debonding, p. 186
Deflection, pp. 76, 101, 1150
Delamination, pp. 227, 386, 677, 738, 876, 1111, 1198, 1295
  buckling, p. 813
  laminate, p. 987
  three-dimensional cracks, p. 227
Diffusion coefficients, p. 973
Diffusion-controlled kinetics, p. 800
Direct processing, p. 624
Disbond, p. 876
Dispersion mixing, p. 624
Double cleavage drilled compression, p. 778
Dynamic relaxation, p. 101
Dynamic strain, p. 268
Electrical conductivity, p. 844
Electromagnetic fields, p. 1212
  magnetic enclosures, p. 1212
  magnetic scalar potential, p. 1212
  magnetic shield, p. 1212
Emissivity, p. 1221
Energy method, p. 642
ENF specimen, p. 1295
Entropy, p. 210
Epoxy molding compound (EMC), p. 506
Equations of equilibrium, p. 642
Extrusion, pp. 470, 633
  controlled curvature, p. 470
  co-rotating twin screw, p. 311
  die design, p. 470
  directed flow die, p. 470
Fabric preform, p. 752
Fabric reinforced composites, pp. 489, 1096
  aramid fibers, p. 1096
  fracture mechanisms, p. 1096
  knitted structures, p. 1096
  tensile properties, p. 1096
  warp-knitted fabrics, p. 1096
Failure
  first-ply, p. 545
  kinking, p. 1016
  maximum stress, p. 602
  mechanisms, p. 987
  modes, successive, p. 602
  prediction, p. 1270
  process, p. 341
  progressive, p. 1043
  theory, Tsai-Wu, p. 602
Fatigue, pp. 359, 738, 943, 1058, 1111
Fiber-matrix adhesion, p. 139
Fiber-matrix debonding, pp. 341, 677
Fiber-optic sensors, p. 268
Fiber-reinforced materials, p. 1270
Fiber volume fraction, p. 973
Fibers
  aramid, p. 1096
  attrition, p. 844
  axial, p. 156
  breakage, p. 341
  carbon, p. 1311
  continuous, p. 624
  critical length, p. 139
  embedded, p. 268
  layup sequence, p. 602
  loading, p. 139
  long, p. 844
  middle-end, p. 156
  nickel-coated graphite, p. 844
  optical, p. 268
  pull-out, pp. 296, 677
  shape, p. 973
  short sisal, p. 139
  undulations, p. 865
  waviness, p. 1171
Filament winding, pp. 570, 698, 865
Filament-wound cylinders, p. 865
  buckling, p. 865
  fiber undulations, p. 865

(continued)

Filament-wound cylinders *(continued)*
stiffness coupling, p. 865
Finite difference method, p. 2
Finite element analysis, pp. 2, 76, 101, 227, 237, 341, 498, 723, 854, 1026, 1043, 1150, 1198, 1212, 1221
Flat braid, p. 156
Fluoropolymer processing aid, p. 633
Foams, pp. 186, 359
Fracture
interlaminar, p. 1295
mixed mode, p. 1295
open mode, p. 1198
shearing mode, p. 1198
Fracture mechanics, pp. 227, 987
Free volume, p. 327
FTIR spectroscopy, p. 1239
Fuel tanks, p. 498
Fusion bonding, p. 723
Gel effect, p. 800
Geomembrane, p. 285
Geometric nonlinearity, p. 101
Global/local analysis, p. 237
Gradient field, p. 1111
Graphite/bismaleimide, p. 268
Graphite/epoxy, pp. 268, 378, 602, 1281
Grid-stiffened panel, p. 237
Hamilton's variational principle, p. 1150
Heat conduction, p. 210
Heat transfer, pp. 854, 1026, 1221
Hertzian contact, p. 677
Higher order theory, p. 2
Hill's yield criteria, p. 1150
Hygrothermal instability, p. 58
IC packaging, p. 506
Impact, pp. 256, 813
characterization, p. 677
damage, p. 1281
damage resistance, p. 584
low velocity, p. 404
properties, p. 844
testing, p. 584
Impregnation, p. 156
Inelastic analysis, p. 101
Injection molding, pp. 624, 686, 769
crystallization, p. 769
shrinkage, p. 769
warpage, p. 769
Interferometry, p. 268
Interlaminar stress, pp. 2, 237, 386, 404, 1198
Irreversible heat transfer, p. 210
Isocyanate treatment, p. 139
J-integral, p. 227
Joint failure, p. 128
Laminates, pp. 2, 76
composite, pp. 2, 227, 559, 712, 813, 854, 888, 1043, 1058
composite, tapered, p. 386
compression loading, p. 1043
compression strength, pp. 414, 1043
damping material, p. 738
defects, p. 414
delamination, p. 987
effective properties, p. 386
epoxy, p. 489
fiber breakage, p. 1043
flaw criticality, p. 414
glass/epoxy S2/SP250, p. 386
laser cutting, p. 854
layer waviness, p. 414
longitudinal splitting, p. 1043
matrix cracks, pp. 987, 1043
microbuckling, p. 1043
notched strength, p. 1043
orthotropic rings, p. 378
plates, pp. 227, 536, 876, 1281
progressive failure, 1043
sandwich, p. 2
singular hybrid element, p. 987
stiffness reduction, pp. 865, 987
strength, pp. 545, 738
theory, pp. 865, 1198
thermoplastic, pp. 414, 677
transverse cracking, p. 987
Linear solid elements, p. 237
Loading rate, p. 48
Loss moduli, p. 139
Mandrels, p. 698
Material nonlinearity, p. 101
Matrix cracking, pp. 341, 987, 1111
Matrix plastic deformation, p. 341
Matrix splitting, p. 1111
Melt fracture, p. 633
Microbuckling, p. 1171
Microcellular polycarbonate, p. 359

Microelectronic encapsulation, pp. 506, 1190
Micromechanical analysis, pp. 341, 430
Microwave dielectric analysis, p. 173
Modulus of elasticity, p. 1311
$(n - 1)!$ solutions, p. 670
Neural networks, p. 1270
Newspaper fiber-reinforced composites, p. 1311
  carbon fiber, p. 1311
  landfill, p. 1311
  municipal solid wate, p. 1311
  plastics, p. 1311
  thermomechanical pulp, p. 1311
Nondestructive evaluation (NDE), p. 536
Linear regression, p. 800
Nonlinear shell elements, p. 237
Non-return-valve, p. 624
Nonrigid interface analysis, p. 1198
Normal compression, p. 677
Normal shear punch, p. 677
Offset nodes, p. 227
Optical fibers, p. 268
Orthotropic laminated rings, p. 378
Outgassing, p. 1239
PEEK, pp. 327, 723, 943, 1138
  brittle-ductile behavior, p. 943
  environmental resistance, p. 1138
  matrix, p. 1138
PEEK/carbon composites
  crystallization, p. 916
  fractography, p. 916
  fracture, p. 916
  molding parameters, p. 916
  morphology, p. 916
  processing, p. 916
Plastic analysis, p. 686
Plastic packaging, p. 951
  electronics packaging, p. 951
  manufacturing, p. 951
  physical design, p. 951
  plastic quad flat (PQFP), p. 951
  thin small outline (TSOP), p. 951
Plate finite elements, p. 227
Plate theories, p. 227
Ply properties, p. 404
Polycrystals, p. 186
Polyethylene, pp. 139, 285, 498, 633
Polymer crystallization kinetics, p. 686
Polymerization, p. 800
  free-radical, p. 800
  styrene, p. 800
  suspension, p. 800
Polymers, pp. 359, 520, 698, 778, 787
Polypropylene, p. 480
  annealing temperature, p. 480
  maleic anhydride modified, p. 1311
  mechanical properties, p. 480
  mode of extension, p. 480
  morphological properties, p. 480
  optical properties, p. 480
  orientation characteristics, p. 480
  orientation temperature, p. 480
  processing, p. 686
  stretch ratio, p. 480
  thermal properties, p. 480
Polyurea, p. 1239
Polyurethane, pp. 1239, 1252
  discoloration inhibition, p. 1252
  foam, p. 1252
  phosphites, p. 1252
  scorch, p. 1252
  ultraviolet light, p. 1252
Postprocessing, p. 404
Pressure vessel, p. 198
Printed wiring boards, p. 489
Reaction injection molding (RIM), p. 1239
Regression analysis, p. 311
Reinforced plastics, p. 888
Reissner-Mindlin theory, p. 101
Resin transfer molding (RTM), pp. 1081, 1339
  molding filling, p. 1081
  non-isothermal filling, p. 1081
  numerical simulation, p. 1081
  void formation, p. 1339
Resins, p. 173
Resistance welding, p. 723
Ritz method, p. 642
Scanning electron microscopy (SEM), pp. 677, 1311
Scatter, p. 712
Sensitivity analysis, p. 386
Sensors, pp. 173, 268
Shape instability, pp. 58, 1171

(continued)

Subject Index (continued)
Shear deformation, pp. 76, 677, 1221
Shear instability, p. 1171
Shear lag analysis, p. 430
Shear slip, p. 1198
Shift rate, p. 327
SiC fiber, p. 296
Simple beam theory, p. 1295
Simply supported condition, p. 677
Skin-stringer interface, p. 237
Slip velocity, p. 633
Smart structures, p. 268
S-N data, p. 1058
Spacecraft structure, p. 738
Specific damping capacity, p. 210
Spline approximation, p. 404
